Privacy Policy for DevoScan

Effective Date: 01/01/2025

1. Introduction

Welcome to DevoScan. This privacy policy describes how DevoTrend IT ("we," "our," or "us") collects, uses, and protects information when you use the DevoScan mobile application ("App").

2. App Purpose

DevoScan is a barcode scanner mobile application designed to simplify inventory management, product tracking, and logistics processes for businesses and individuals. The App enables users to scan barcodes and send collected data to a web-based portal for centralized tracking and monitoring. This enhances operational efficiency by providing real-time visibility into product movement, inventory updates, and scanned product history.

Organizations can subscribe to the web application, where an administrator can create and manage user accounts. Individual users can also subscribe to utilize the App independently for their own barcode scanning and tracking needs.

3. Information We Collect

DevoScan does not collect or store personal information. The App only gathers and transmits specific data necessary for its functionality:

- **Barcode Data**: The barcode number scanned by the user.
- **User ID**: A unique identifier associated with the logged-in user (created by the admin for organizations, or self-created for individual users).
- **Location Data**: The approximate geographic location of the user when scanning a barcode (only if permission is granted by the user).
- **Timestamp**: The date and time when the barcode was scanned.

This data is securely transmitted to a MySQL database, accessible only by authorized administrators of the respective organization or the individual account holder.

4. How We Use Your Information

The collected data is used solely for business and operational purposes, including:

- Tracking barcode scan activity across different locations.
- Associating scanned barcodes with users and timestamps for accurate reporting.
- Enabling company administrators to review scan history for inventory management and logistics.
- Supporting businesses in monitoring product movement, deliveries, and stock levels.

We do not use the collected data for advertising, marketing, or any purpose beyond the intended functionality of the App.

5. Permissions Required & Their Purpose

To function effectively, DevoScan requires the following permissions:

- **Camera Access**: Used exclusively for scanning barcodes. The App does not use the camera for any other purpose.
- **Location Access**: Used to capture the approximate location of the user when a barcode is scanned. This helps businesses track inventory movement and location-based scanning activities.

The App does **not** request access to contacts, messages, photos, or any other sensitive personal data.

6. Data Security

We implement industry-standard security measures to protect collected data, ensuring it is securely stored and transmitted. All data transfers between the App and our servers are encrypted, and access is restricted to authorized administrators only.

7. Data Sharing and Disclosure

We do not share, sell, or distribute user data to third parties. Data collected is only accessible to the administrators of the respective company or the individual account holder and is used strictly for operational purposes.

8. User Rights and Control

- **For Organizations**: User accounts are created and managed by company administrators. Users cannot delete or modify collected data but can review their scan history.
- **For Individuals**: Data is stored within their account, and they can access their scanned history via the web portal.

If you have concerns regarding your data, please contact your company's administrator or reach out to us using the contact details below.

9. Changes to This Privacy Policy

We may update this privacy policy periodically. Any changes will be posted on this page with a revised effective date. Continued use of the App after updates constitutes acceptance of the new policy.

10. Contact Information

If you have any questions or concerns regarding this privacy policy, please contact us at:
